

# Insuring your **Hired in Plant**

Many clients will enter into hiring agreements for plant hire and will be required to accept various responsibilities in relation to the plant as well as financial loss to the hire company. Many hire companies routinely contract based on CPA conditions as standard. Over recent years other hire contracts are becoming common and some of these impose far more onerous terms on the hirer.

The Maven Hired in Plant policy provides for legal liability of the hirer to the hire company so any loss or damage to the plant and continuing hire charges are covered up to the policy limits. Unlike many other policies, the Maven policy has no restriction of cover to CPA conditions.

When a client had to claim for a total loss of an excavator, Maven settled for £85,000 as the client's hire contract legally required them to replace with a new machine. Without this important benefit the client could have been liable for any shortfall between the insurance policy settlement and the total cost of replacement which could have been as much as £30,000.

By providing cover where clients need it most, Maven are the broker's choice for Hired in Plant insurance.
